Case 10946A-14Re

We have lived across the street from Robert Smith for many years. Now he has 4 cars a boat and boyfriends car parked across from us. One car can fit in the garage.

This is at least his third boat, each one bigger. They sit there from April to November. He does go up north 2-3 times a summer. He doesn't fish here.

In his house he tore out walls, moved outlets, gas lines, new doors, ceilings cabinents all without a permit that I know. He laughs about not letting in the assessor.

When I got the notice about his boat. He told me the city was going to fine him that they just wanted money later he said he was going to drag it out as long as he could, so he has his boat here all the time. He told me it didn't matter if I signed the paper or not. I truly believe he intends to keep the boat in his driveway like the last 20 or so years. He thinks the boat looks good sitting there. I wish he would conform like everyone else.
