Item

**Alternative Transportation Plan Update**

---

Date

7/8/2015

---

Description

Staff is in the process of preparing a final draft of the Alternative Transportation Plan (ATP) Update. One of the revisions to the final draft as directed by Council is to incorporate the costs to maintain the existing trails within City street right of way and City parks into the ATP Update. That way the proposed plans for improving alternative transportation in the City can be considered at the same time as plans and cost for maintaining City trails.

At the June 8 Council study meeting, City Engineering staff made a presentation regarding the Pavement Management Program (PMP). Enclosed is the portion of the presentation on the proposed PMP for trails. Staff will review this portion of the presentation at the July 8 PARC meeting

Once staff the revisions to final draft of the ATP Update are compiled and reviewed with Council, staff will bring a final version of the ATP Update document back to Council for consideration
