Dear Bloomington Planning Commission:

Regarding the signed consent form for the recreational vehicle we would like to respectfully submit the following request for permission without all signatures. We currently have almost all of the required signatures which we believe to be a resounding majority. We previously had spoken to a woman at the City office who looked at our plot/lot and said that yes- that location would be the only place for it to go and also yes the location should be fine.

The recreational vehicle/ vehicle trailer was purchased and added to our yard because as a hobby we enjoy classic car shows locally, out of town and furthermore out of state. We need the trailer so that during travel to and from the classic car shows the vehicle remains clean, dry and undamaged. This is an item that generates frequent usage. Due to the lot design and the indication from the city office we had no other place to put item. This location is screened on 3 out of 4 places, all sides except the front are screened in. Furthermore it is set back so it is completely flush with the side of the home/garage.

We have a spot next to the garage that houses the trailer that has -since 1994 housed either a boat or a camper or some other trailer. There was no indication from anyone that using that same spot that once housed the boat and other things would cause any nuisance.

In closing we are willing to pay the permit fee in which to use the same spot adjacent to our home that we have been using for years. Please accept this proposal and contact us with finalization of approval.

Sincerely,

Janice Bengtson
