

cc: Shelly Pederson - Engineering RECEIVED

NOV 05 2014

City of Bloomington
Engineering Division

To the Mayor and Council of the City of Bloomington.

We the undersigned are opposed to the reconstruction of Fremont Ave. with the addition of curb, gutter and other engineering elements. It is our opinion that the current street functions adequately without the proposed upgrades.

The expense, disruption, and the negative environmental impact during and after construction outweigh the marginal improvement a reconstructed street would provide.

The current street is in good condition and can remain so with minimal maintenance.

We collectively and sincerely ask you to remove Fremont Ave. from the 2015 PMP.
